A high-angle photograph of a person climbing a light-colored rock face. The climber is wearing an orange tank top, green shorts with a logo, and climbing shoes. They are secured by ropes and gear, including a carabiner and a rope. The background is a textured rock surface.

More than twenty years have passed since the birth of E9. Many things have changed in the “World” system. Everything has been unnaturally and frantically speeded up against all human inclinations. The abysmal distance from concrete life which took its cues from traditions, from the rhythms of nature, and which did not necessarily follow the logic of profit made us forget values and sound principles. We have turned into “automatons”, extensions of our smartphones, unable to express real feelings but more and more attentive to how to appear. The necessary logic to continue that altruistic and sustainable path of real “construction” has failed. But suffering nature has imposed its stop. Although we already knew it, it’s time to react before all the remaining good things will be erased. Consumerist logics have failed. Returning to the consumption of what is necessary is an obligation for a better future in balance with Mother Earth. Don’t waste, don’t buy just because it’s cheap. We need to use what we really need, taking inspiration from nature and the way it works, its perfect mechanism, its beauty, its harmony, its true elegance without formality and full of strength.

Proletas

Made in Italy "Km Zero"

Do you know where your clothes come from? Since the very beginning we have been producing our clothing in Italy. This has always allowed us to support and enhance local craftsmanship, to eliminate CO2 emissions from the production process thanks to short-haul transport and to guarantee our direct and accurate control in every production step.

NO-POLYBAGS PROJECT

Since summer 2020 we have been eliminating polybags from our products. Thanks to the cooperation of all our customers in 2021 we reached the target of 95% of polybags-free products. This is not the end, we aim to 100% in the next few seasons. Let's keep joining forces to make it successful!

MEMBER OF:

SINGLE
USE
PLASTICS
PROJECT

SORONA® PROCESS

Sorona® fibre is a polyester composed of the bio-polytrimethylene terephthalate (PTT) obtained from the fermentation of glucose and processing of corn seeds. Sorona® yarn is made up of 37% renewable sources and this means that during the production process there is a 37% decrease in energy consumption and a 63% reduction in CO2 emissions.

In the padding jacket, the interior in Sustans™ down-like made with Sorona® fibers ensures breathability, high insulation performance, warmth and comfort in any situation. It is quick dry, with high elasticity, softness and recovery of its excellent bulkiness even after numerous washes. It represents a valid alternative to down.

BABY COLLECTION

3-12 MONTHS

The idea was born from a Mum and a Dad to bring their experience as parents and climbers offering high quality, creative and versatile products to meet the needs of your baby on outdoor adventures and everyday life. Unique for craftsmanship, colors and attention to detail.

STRONG HERO COLLECTION

Get superpowers!

Strong Hero is a line of innovative and functional accessories designed specifically for climbers where product quality meets fantasy through its Boulderboy champion.

ORGANIC COTTON

Better for People, better for Earth. Choosing organic fibers is an act of caring for your health and the environment. Organically grown cotton uses solutions that respect nature to limit the use of pesticides and improve the quality of the soil. These methods use less water, support biodiversity and protect farmers from harmful chemicals.

Our Cotton is certified:

MODAL - LYOCELL

These fabrics come from bio-based fiber derived from the wood pulp. Extremely comfortable and flexible, they dry quickly, are crease resistant and stay soft on the skin and bright even after many washing. These fibers are biodegradable and compostable. A key fabric in the textile industry with its lightweight, stretchy and breathable nature. An eco-conscious, stylish and durable choice for clothing.

BLEND WOOL

With the appearance of “good old wool sweater”, the wool of the Woolwood line has been designed to offer excellent protection and at the same time an original style. Wool gives the garment great warmth, softness and thermal function, ensuring your body maximum comfort when the temperature drops. Most of the wools in the collection are recycled.

SUPERSTRETCH

It is a superflex technical fabric made with organic cotton. The main features are tear resistance given by the polyester ligatures and the high elasticity due to the particular finishing that, thanks to a specific thermofix, grant an excellent elastic recovery.
