

KILTERBOARD PRICING

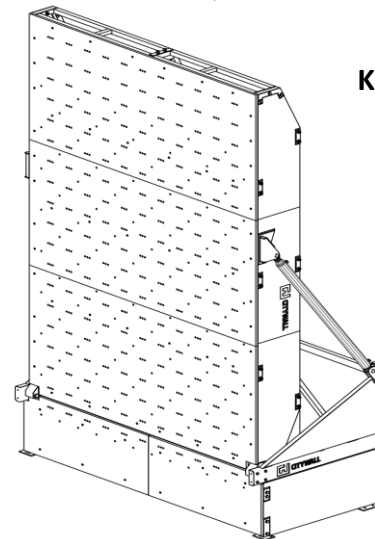

The Kilter board is a modern training wall that allows various exercises. Each hold has been scrutinized for comfort and grip style, allowing one to train on open hand holds, incuts, pinches, crimps and slopers. The LED light system lights up the holds that and lays the problem before you. The layout of these holds is standardized across the globe, allowing climbers to set and climb uniform problems no matter where the location of the board is.
